# INDUSTRIAL PRODUCTION

The industrial production index increased slightly in September due mainly to the gain in non-durable manufacturing. Electric power and mining output also moved upward.

O)Averages or totals of unadjusted data. O)Seasonally adjusted at annual rates. O)Gross National Product at market prices excluding accrued net income of the operators from farm production. (O)Seasonally adjusted quarterly averages of monthly data.

### MANUFACTURING PRODUCTION

Durable goods output declined again in September partly as a result of a fall in motor vehicle production during the change-over period. Non-durables turned upward, reaching a new high.

# SELECTED GROUPS IN RETAIL TRADE

Seasonally adjusted new passenger car sales turned down in September, preceding the advent of new models. Both clothing and furniture and appliance store sales moved upward.

<sup>(1)</sup>Averages or totals of unadjusted data. <sup>(1)</sup>Seasonally adjusted at annual rates. <sup>(2)</sup>Seasonal adjustment computed by Central Mortgage and Housing Corporation.

(a)Three-term moving average of seasonally adjusted data.

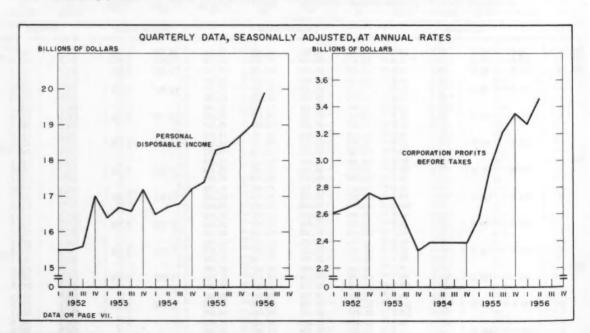

### HOUSING STARTS AND COMPLETIONS

Seasonally adjusted housing starts in October continued their downward trend. Housing completions were below the levels of the spring months.

### PERSONAL DISPOSABLE INCOME AND CORPORATION PROFITS

Personal disposable income has shown steady increases since early 1954. Corporation profits have advanced sharply since the end of 1954 except for a minor decline in the first quarter of 1956.

<sup>0)&</sup>quot;De facto" population. Annual data are for June. (3)At current market prices. Annual data are totals of the four quarters. (3)This index is also published on the base January 17 1968=190. On this base the index for September was 193-1. (6)Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries.

When series are totals of the four quarters. (3)This index is also published on the base January 17 1968=190. On this base the index for September was 193-1. (6)Output of building and civil engineering work excluding the output of building and civil engineering industries.

When series All manufactured products other than food, fuel and tobacco.

Note.—Until the end of 1985, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1985 have been revised accordingly. Monthly figures for 1986 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

1) Not applicable to figures on population and immigration.

1) Without and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1981.

1) Exclusive of stillbirths.

2) Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

(a) Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation of This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

O'Seasonal (formerly supplementary) benefit data included.

O'On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included.

O'Estimates based on number of payment documents; prior to February 1955, data related to week containing last working day of month; commescing with February 1955 estimates are based on average weekly number of payments.

O'Commencing with October 1955, the number of calendar weeks during which a benefit payment was made; prior to that date, payment was made on the basis of individual days.

O'Deemployed days prior to October 2, 1955.

O'Deemployed days prior to October 2, 1955.

OExcludes gold. O'Arithmetically converted from 1935-39=100. O'Indexes were revised after the announcement of payments on barley in November, on oats in December and of interim and final payments on wheat in February and May respectively. (OExcluding Newfoundland. Western grain prices used in the construction of the Index price to August 1, 1955 are final prices. Prices for the Western grains used in the construction of the Index since August 1, 1955 are initial prices only for wheat, oats and barley.

OAs of January 1954 and January 1955, a number of distributors not previously reporting were added to the survey.

OBarrels of 35 Imperial gallons.

OBarrels of 36 Imperial gallons.

OBarrels of 37 Imperial gallons.

OBarrels of 37 Imperial gallons.

OBarrels of 38 Imperial gal

Note: In view of the change, in March 1955, in the method of reporting certain categories of refining operations, the classification of the table was altered so that continuity of the series could be maintained as much as possible.

OPrior to March, 1955 excludes a certain amount of imported fuels.

O'In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values.

O'Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be falled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

O'Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys.

O'Manufacturing inventory owned by manufacturers, whether held at plant or not, at end of period. Source: Monthly Report of Inventories, Shipments and Orders in Manufacturing Industries, D.B.S.

O'Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

O'Total pulp production covers "ecreenings" which are already included in exports. "Screenings" are escluded throughout from mechanical and O'Mill shipments destined for export.

Bource: Production, Shipments and Stocks on Hand of Sawmills, D.B.S.

Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.

"Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Morigage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample area lying outside these municipalities were also chosen for complete enumeration; in June, 1955, the number of sample areas was increased to nearly 800. O'The coverage was extended to 507 municipalities in 1948, and as of 1956, stands at 901, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the templetion of the operation.

<sup>0)</sup>Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

(O)Planks and boards, flooring and aquare timber.

(O)Planks including fireproofing and load-bearing tile.

(O)Production of firms which normally account for 96% of total Canadian production.

UCoverseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.

\*\*Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

\*\*(\*Annual data are monthly averages of crop year. (\*)\*Includes eggs for hatching.

Offin the upper section of this table, the annual statistics prior to 1955 embrace all steam railways, while monthly averages for 1955 and monthly data refer to railways with annual operating revenues of \$500,000 or over.

O'Revised series. The Canadian Pacific, Canadian National, and Quebec North Shore and Labrador and Pacific Great Eastern railways now use the "Uniform Classification" but will be required to do so a from January 1, 1957.

O'Operating iscome equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

O'The 1956 figures are not strictly comparable with previous years, due to the addition, in January, of 5 railways and the deletion of cost. On a comparable basis, revenue tens carried in June 1955 would have been 17,100,000, revenue scans carried one mile 5,516 million, revenue passengers carried one mile 200 million.

O'Pacific Great Eastern Railway included as from January, 1956, previously included in "Other Railways."

O'Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

O'Prior July, 1954, the figures are not adjusted for items in transit.

O'Prior to July 1st, 1954, the statutory minimum requirement was 5 per sent for each day; since that date it has been a monthly average of 8 per cent.

O'Mainly deposits of foreign banks.

O'Capital, rest fund and undivided profits as at the latest facal year-end.

O'Including issues payable in foreign currency.

O'Excluding Canadian day-to-day loans.

O'Excluding Canadian day-to-day loans.

O'Expluse for June 30, 1954, alter adjustment for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,780. Includes loans to grain dealers and exporters, loans to finance the purchase of Canada Savings Bonds at time of issue and all other loans in Canada.

O'Includies deposits with other banks in foreign currency, foreign bank notes, gold and coin outside Canada and foreign currency items in transit (net).

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and sales without insurance. Totals are estimates projected from the sales reported by 31 companies operating in Canada representing 86 per cent of new ordinary union sales.

"The Canada totals for most months in 1954 and 1955 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. The Canada totals are comparable for these two years. Provincial monthly totals for 1955, however, are not comparable with those for 1956 due to changes by several companies in the manner of reporting new business. For 1956, the Canadia and provincial figures are comparable with each other, but are not strictly comparable with previous years. On a comparable basis the Canada total in September 1956 was 15% above that of September 1955. The annual figures for Canada and the provinces are consistent, although the 1955 data are still preliminary.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to set profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (maintaing government-owned companies and incorporated co-operatives).

Of Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.
